MVC

PORTUGUESE LIMESTONES

MVC is based in the extraction centre of limestones in Portugal, having 9 quarries, and dedicates its activity to the transformation of limestones such as "Vidraço Moleanos", "Moca Creme", "Calcário dos Candeeiros", "Rosal", "Codaçal", "Gascogne Blue/Beje/MIX", "Vidraço Ataija Azul", "Lioz Abancado", "Atlantic Blue", amongst others.

Our main products are Tiles in standard sizes and thickness, Slabs and Cut to Size with various types of finishing. The company is equipped with the latest technology in the transformation of ornamental stones. It is also associated with extraction companies, which gives it a high productive capacity and a rigorous control of production. This helps to answer, in quantity and in quality, all the exigencies of the national and international markets.

FAFSTONE

Fernando Almeida & Filhos

At Fafstone, vision, rigor and solidity are terms that we know well. In everything we do, these are the foundations that allow us to continually exceed expectations and to respond, with quality answers, to our clients' needs. With over 25 years of activity and experience in the business of extraction, transformation and commercialization of ornamental rocks and granite products, our company has built a solid course, characterized by constant evolution. Today, we continue to infuse each job with the competence and know-how that distinguishes and exemplifies us. We work with professionalism, dynamism and modernism in order to assure the completion of any job with top quality and competitiveness. We possess the dimension and response capacity that adapts perfectly to the needs of the market and the requirements of the client.

PARDAIS GRANITES
REMODELING STONE CONCEPTS

Was created in 1992, yet its founders already worked together from an early age. The father, founder of the company, taught them all about working in granite and instilled in children the principle of seriousness and doing things well. Since then, they have been working together for 40 years.

Originally, the company was dedicated to the construction of private homes and all kinds of small constructions in granite. With the advancement of time, the

company followed the requirement of the market and invested in technology that allowed the growth and the ability to deliver more and better products. Today it is a reference of the sector in Portugal and central Europe where they have made emblematic works (see Portfolio) They have three own quarries and they have about 75 employees.

OLIVEIRA RODRIGUES GRANITOS DE PEDRAS SALGADAS

More than 40 years of history are evidence of the work and professionalism of our company in the Rock Ornamental sector. With this experience we know the importance of the raw material and the subsequent process of transformation and preparation for the final product. There for, we count on own quarries which are guaranteed quality end products controlled from the origin. To this we have been expanding our factory processing giving us greater capacity and ability to elaborate an increasingly extensive range of products. Different formats, thicknesses and finishes are possible today thanks to technological innovation we have been focusing on and professionalism of the entire team that works very hard to meet the quality standards that distinguish us. The extraordinary works are provided so the testimony of the seriousness and experience that accompany the name of Oliveira Rodrigues, Lda. that seeks to satisfy not only the professional market, but also the private consumer.
